The screenshot shows the FileZilla FTP client interface. The top panel displays the connection details for the host `ftp.fa.ulisboa.pt` with username `20201412` and a masked password. The status bar indicates a successful file transfer of 0 bytes in 1 second.

The interface is split into two main panes:

- Local site:** `C:\Users\20201412\`. This pane shows a tree view of the local file system, including folders like `20201412`, `20211399`, `20221330`, `20221337`, `administrator`, `Administrator.2022D006`, `All Users`, `Default`, `Default User`, `DefaultAppPool`, and `Public`.
- Remote site:** `/public_html`. This pane shows a tree view of the remote site structure, including a folder named `public_html`.

Below the panes is a detailed file list table with columns for `Filename`, `Filesize`, `Filetype`, `Last modified`, `Permissions`, and `Owner/Group`.
